

Biological Control of Insects and Mites in Greenhouses
Sponsored by the
Connecticut Agricultural Experiment Station and the University of Connecticut

Where: The Valley Laboratory, Connecticut Agricultural Experiment Station,
153 Cook Hill Road, Windsor, CT 06095

When: Wednesday March 24, 2010 - 9 AM—3 PM

This workshop will be taught by Suzanne Wainwright-Evans of Buglady Consulting (www.bugladyconsulting.com) and Hugh Smith, an entomologist with the Connecticut Agricultural Experiment Station. The workshop will focus on management of whiteflies, aphids, thrips, mites, fungus gnats and shore flies in the greenhouse using biological control agents. This workshop has been approved for 4.5 pesticide recertification credits (4.5 CEUs).

Because of the hands-on nature of this workshop, enrollment is limited to 25 people.

Agenda

- 9-9:30—Coffee and registration (\$40 per person)
- 9:30-10:00 – Transitioning to biological control and developing a biocontrol program
- 10:00-12:00 – Management of key greenhouse pests using biocontrol agents
- 12:00-1:00 – Lunch (included)
- 1:00-2:00 – Identification of pests and biocontrol agents using hand lens and microscope
- 2:00-2:30 - Evaluating the efficacy of biocontrol agents in the greenhouse
- 2:30-3:00 – Integrating biocontrol with other pest management tactics
