

## ***Eurybia divaricata* • white wood aster**

**FOR GENERAL GROWING NOTES SEE "GENERAL GROWING PROTOCOLS" CARD**

**PLANT CHARACTERISTICS:** white blooms. H= 2-4' Spread 2-4'

**DESIRED SITE LOCATION & SPACING:**

- part shade - shade
- medium-dry soil
- drought tolerance = medium
- staggered spacing 20-24" between plants and rows  
(recommended spacing (24-36"))

**ECOLOGICAL BENEFITS:**

- Wildlife: flowers attract butterflies
- Conspicuous Flowers: yes
- Attracts: butterflies
- Nectar Source: yes, for butterflies and moths

|                           |                                    |
|---------------------------|------------------------------------|
| Seed Stratification       | cool and moist, minimum of 60 days |
| Seed-Sow to Finished Plug | February to mid-May (14 weeks)     |
| Outplanting               | late May                           |
| Flowering Period          | September - November               |

#### SOWING & SEED DEPTH:

- Sow 3 seeds per cell; cover with media equal to thickness of the seed

#### SEED COLLECTION:

- November
- harvest only seed heads leaving stems for overwintering insects
- light and airy, white puffs
- seeds easily fly away when mature
- fluffy papus needs to be removed from seed prior to storage

PESTS & DISEASE: monitor for European chafer beetle leaf damage
