

GROWER'S PLANTING GUIDELINES - small plants

COMPACT STANDARD ROW SPACING = plants uniformly spaced 10" apart, (normal suggested spacing is 12"-18"). 50 rows of 4 plants in a 4' wide row requires an approximately 40' long row.

This spacing works well for plants such as: Asclepias tuberosa, Mimulus ringens, Lobelia cardinalis,

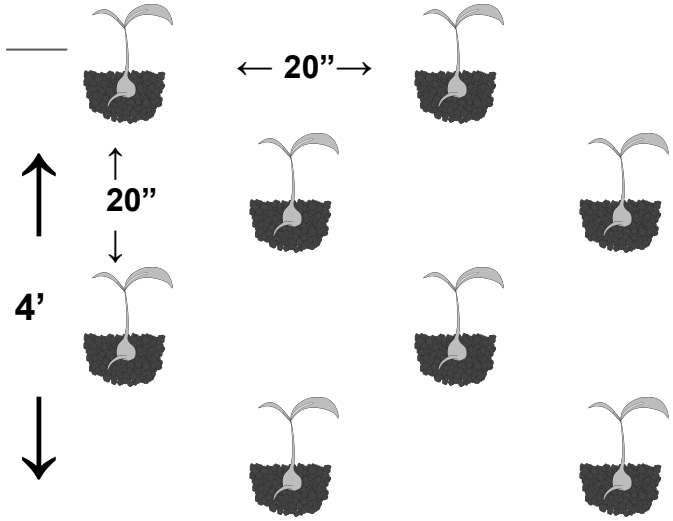

NOTES:

GROWER'S PLANTING GUIDELINES - large plants

COMPACT STAGGERED ROW SPACING = plants staggered, spaced 20" apart (normal suggested spacing is 24-36"). 100 rows of 2 plants each in a 4' wide row requires an approximately 80' long row.

This spacing works well for plants such as: Rudbeckia hirta,, Vernonia noveboracensis, Eutrochium, etc.
